PROJECT STATUS KEY

- In Progress (On Schedule) - Project is progressing as planned and on schedule.
- In Progress (At Risk) - Project is progressing as planned but has had some minor delays or setbacks. If the delays or setbacks are not addressed the project will not be completed on-time.
- In Progress (Critical) - Project is not progressing as planned and has had significant delays or setbacks. If the delays or setbacks are not addressed immediately the project will not be completed on-time.
- In Progress (Missed Delivery Date) - Project is still moving forward but has missed its delivery date.
- Completed (Early) - Project was successfully completed ahead of schedule.
- Completed (On Time) - Project was successfully completed on time.
- Completed (Late) - Project was completed behind schedule.
- Not Started - Project has not begun.
- Deferred - Project has been deferred.
PROJECT STATUS

Academic Advisement

College of Education - Field Placements
The College of Education will create a responsive, centralized data system in order to systematically and comprehensively gather evidence on candidate learning, program operations, placement rates, clinical experiences, and candidate characteristics.

Expected Completion Date: November 30, 2017

In Progress (On Schedule)
This project is now in progress and on track. Enterprise Systems has been meeting with representatives from the College of Education to further define the data elements that need to be recorded within myWSU and need to be reported to PESB. These meetings will continue throughout the Summer.

Admission & Recruitment

Accept/Decline Admission
Working closely with the Admissions Office, the project aims to streamline the process for students to accept admission. This will reduce the workload on staff and allow all students to go through a single admission process.

Expected Completion Date: September 30, 2016

In Progress (Critical)
Development has resumed to streamline the steps involved to accept an admission offer. This is a top priority. Work is also under way to address an issue encountered when applicants have more than one application. Finally, work to add hyperlinks to the pages at the end of the process (for the MBA, only) is on hold to accommodate academic structure changes that will take effect in August. Work on the links will resume after the changes are active. The status is RED because we have missed the original targeted deadline of December 31, 2015.

Evaluate My Transfer Credit
The Evaluate My Transfer Credit component allows students and prospects to self-report transfer credit and view an unofficial articulation report and advisement report based on the information provided.

Expected Completion Date: July 31, 2016

In Progress (Critical)
Technical development continues. The first four pages of the five-page process have been updated to better accommodate WSU’s academic structure. The component may be made available to current students and applicants once this work is complete. No progress has been made to provide visitors a way to log in and use the utility. Enterprise Systems is evaluating the impact of the creation of these accounts on the system before continuing.

Gathering Race and Ethnicity Information
This project will track the work to reduce the number of applicants for the Summer and Fall 2016 Terms who have not specified race/ethnicity information.

Expected Completion Date: September 30, 2016

In Progress (On Schedule)
Extracting race and ethnicity information from a number of sources, we were able to reduce the percentage of students with no race or ethnicity information from 15% down to 5%. Work is now in progress to develop a page that will allow us to prompt the remaining 5% for their race and ethnicity information when they log into myWSU.

Implement Undergraduate Admission Application Evaluation
The Undergraduate Admissions Office will begin using the Application Evaluation component to evaluate applications that don’t immediately qualify for admission.
In Progress (On Schedule)
The project is on track. Admissions Recruiters and Officers are entering application evaluation decisions. Officer decisions to admit and deny are triggering the automated processing that was previously done manually. Enterprise Systems is currently configuring automated actions for decisions where additional information is requested. Once this functionality is in place, access to application evaluations will be expanded to include all campuses.

Mobile Application - Admissions
This project will track the work necessary to implement an admissions section in the mobile application.

In Progress (On Schedule)
The Project Charter has been shared with stakeholders for review and approval.

Business Intelligence

Student Data Warehouse Phase 2
This project will focus on adding additional data and functionality to the student data warehouse that were deferred during the initial project. Items include adding fields such as Financial Aid indicators and different descriptions as well as more complicated fields and tables.

Expected Completion Date: August 12, 2016

In Progress (On Schedule)
This project is on schedule. The first batch of changes will be complete by June 10, 2016. The second batch by August 12, 2016. The below listed tasks will be complete by June 10th.

PTSD-2 Financial Aid Indicators
PTSD-6 Class Meeting Pattern should not have Instructor
PTSD-7 Term Based Facility Table
PTSD-8 Student Degree table add Enrollment Campus
PTSD-9 Add Campus Desc
PTSD-10 Polish data Model Diagram
PTSD-11 Table Columns Hover Text
PTSD-123 Data Dictionary (Version Control)
PTSD-129 Create Financial Aid Pell role
PTSD-134 Class folder multiplying records
PTSD-135 Add Data Dictionary Field, re-order, externalize table/field and load
PTSD-136 Student Advisor Issue

Items that have been completed and added to production:

BUG-3049 PS_W_GRAD_ENRL_PLAN
PTSD-3 Term Descriptions
PTSD-4 Student Advisor Table add Advisor Name and Email
PTSD-5 External Degree Table Add Descriptions
PTSD-12 Student Cohort Table
PTSD-124 Hide ‘Preferred Email’ from Student Email folder
PTSD-128 Requesting more information about Advisors
PTSD-130 Potential issue with Student Data Warehouse subject area
PTSD-131 Service Impact Error
PTSD-132 Test ID
Campus Community

Address Update Via File Load
University Receivables collectors receive address updates from the collection agencies they work with. These files can be in .CSV or .XLS formats. Receivables would like to be able to take those files and automate an update process in lieu of entering them manually one by one.

Expected Completion Date: October 14, 2016
In Progress (On Schedule)
Project charter has been completed and the project plan is being constructed.

ATLAS - Aspiring Teachers
The Aspiring Teacher Leadership and Success (ATLAS) program at Washington State University is a federally-funded TRIO Student Support Services grant. It serves students seeking their first bachelor’s degree in the field of teacher preparation. ATLAS provides exclusive opportunities for future teaching professionals to participate in success advising, exemplary utilization of resources, and institutional activities designed to prepare them for excellence in college and career. Students eligible for ATLAS are first-generation or low-income students, or students with a disability. The program will require resources within myWSU to allow students and ATLAS Advisors the ability to view a students progression within the ATLAS program.

Expected Completion Date: August 1, 2016
In Progress (On Schedule)
Project charter has been completed and the project plan is being constructed.

Display Faculty Photos
Per a request from the Provosts Office the photos of faculty are going to be turned on in myWSU. Some faculty had indicated that they do not want their photos to be displayed. Enterprise Systems needs to expand FERPA to have an OPT OUT feature for the photo display, separate from the restrict all of my data indicator.

Expected Completion Date: August 1, 2016
In Progress (On Schedule)
Enterprise Systems has enabled display of instructor photographs in myWSU Campus Mobile’s test environment. We have confirmed that current FERPA release and restrict configuration does control the display of faculty photographs. FERPA Controls currently allow individuals to either release or restrict all personal information; in which photographs are included. In collaboration with Office of the Provost, it has been determined that an additional option to control release and display of faculty photographs should be added to current FERPA control configuration.

Invest in Success
Invest in Success is a grant program that aids qualifying Washington residents and low income students by teaching them financial responsibility. It also provides a 1:4 match of institutional and federal grants funds with 1 part student/family contributions. Monies are held at Washington Trust Bank and tracked by Provosts Office. The students do not have direct access to the funds but can request fund distributions. The funds can be used for books, tuition, computers, etc. myWSU will be used to track communications, allow application filing, provide agreement tracking, provide reporting and possibly account balance and transaction tracking.

Expected Completion Date: August 1, 2016
In Progress (On Schedule)
Project charter has been completed and the project plan is being constructed.
Enterprise Wide

3C Training
3C communications are configured in myWSU and allow end users the ability to create comments, checklists, and communications. 3Cs have been available in the system, but few departments are utilizing these tools. Enterprise Systems would like to educate end users on 3Cs so they can create comments, checklists, and communications in myWSU. This project will allow for the creation of UPKs to be available to those wanting to use 3Cs and provide a training class through HRS.

**Expected Completion Date:** May 20, 2016

In Progress (On Schedule)

UPKs have been created for this project and will be used to assist in training and will provide an ongoing resource for users. A training outline has been constructed and training documents are being completed. Human Resources will be contacted to schedule this training through their website. This training will be made available by the end of May.

Activity Guide
Users from multiple departments have expressed high interest on the utilization of Activity Guides. Enterprise Systems would like to grant Activity Guides configuration access to users across campus who prove competency through an HR course, allowing departments to create their own Activity Guides.

**Expected Completion Date:** May 7, 2016

In Progress (Critical)

Pilot project with Admissions to create a pop-up activity guide is still in progress. Will be working with tech team to explore customization to allow activity guides to pop-up. Training has been scheduled with Human Resources. Currently completing training for activity guides. Documentation and UPK recordings are complete.

Direct Deposit Consolidation
Enterprise Systems has been asked to consolidate direct deposit information into myWSU. This project will coordinate work required to move direct deposit information from the travel system and payroll into myWSU. It will also facilitate the configuration and testing of systems outside of myWSU that will utilize the direct deposit information to ensure that processing will not be interrupted.

**Expected Completion Date:** October 3, 2016

In Progress (On Schedule)

The charter document for this project was submitted to stakeholders, and it was approved on April 19, 2016. The project plan has also been finalized, and a meeting is scheduled to review and approve the plan on May 11, 2016.

Enterprise Systems has begun work on the project and is in the process of identifying and configuring components in PeopleSoft that will allow for the collection and storage of direct deposit information in myWSU. At this time, the administrative pages have been configured in our test environment. Additional components need to be configured for the pre-note process and for self-service pages before testing can begin.

Financial Aid Enhancement Metrics
Student Financial Services would like to be able to track whether students are using the enhancements we have worked with them on. We have already put a permanent counter on the Award Letter Print button and have provided them with a page for viewing. They would like to be able to have similar tracking on the Student Award Activity Link and My Communication Center.

**Expected Completion Date:** February 12, 2016

In Progress (Missed Delivery Date)

The student Award Activity metric is ready for testing by Student Financial Services, however, they would like to wait until the My Communication Center metric is available to do any testing. Work has taken place to provide metrics on the My Communication Center for Student Financial Services. This metric is being tested internally.
Once a few issues are worked out, this will be released to Student Financial Services for testing and when approved will be available in Production.

**Graduate Business Academic Career**
The purpose of this project is to create a new Business Academic Career and convert Graduate MBA Programs and Students to new Business Career for Fall 2015. This will allow the Graduate MBA Program to manage their own admissions and more effectively track students.  
**Expected Completion Date:** December 31, 2015  
In Progress (Missed Delivery Date)

The second round of updates to the Report are complete. The new reports are being used to clear the Spring 2016 graduating class. Once the class has been cleared and any final issues resolved, the reports will be activated for students.

**Notifications - Notices Replacement**
After recent testing of the Notification Framework, Enterprise Systems would like to explore the possibility of replacing portal notices with notification alerts. Notification alerts are messages sent via the notification framework to a specific population.  
**Expected Completion Date:** November 30, 2016  
In Progress (On Schedule)

Project charter has been created and sent out to key stakeholders.

**PeopleSoft Testing Framework**
Enterprise Systems, through its strategic planning, is looking for an automated process that can effectively produce and validate regression tests before each bundle is implemented. Enterprise Systems would like to eliminate occurrence of human error when conducting testing by automating testing processes. This project will explore unitizing PeopleSoft Testing Framework as a solution to these issues.  
**Expected Completion Date:** August 1, 2016  
In Progress (On Schedule)

Charter has been signed and project plan has been completed. Enterprise Systems is currently working with Oracle On-demand to configure connectivity for the testing framework.

**Related Content Training**
This project will develop training materials to educate end users on the configuration of related content in myWSU.  
**Expected Completion Date:** May 6, 2016  
In Progress (On Schedule)

Majority of the UPKs and materials for the in-person training sessions have been created. A portion of the related content is not fully enabled in myWSU, and Enterprise Systems is working to get this resolved. Enterprise Systems is working to refine the security for related content so that permissions are restricted only to those who will use the additional content.

**WorkCenters**
Users from multiple departments have expressed high interest on the utilization of WorkCenters for their users. Enterprise Systems would like to grant WorkCenters configuration access to users across campus who complete training through an HR course, allowing departments to create their own WorkCenters.  
**Expected Completion Date:** May 20, 2016  
In Progress (On Schedule)

WorkCenter training has been scheduled with Human Resources. Training is being developed. All documentation and UPK recordings have been completed.
**eXplorance Blue**

**Blue Term Reports**
Prepare end of term reports for all college course evaluations.

*Expected Completion Date:* May 6, 2016

In Progress (On Schedule)

Instructor Quick Reports for all colleges are needed for Spring 2016. Respondent Completed Reports are finished for release May 7. Enterprise Systems is working with the Office of Assessment of Teaching and Learning (ATL) to define and produce other reports for colleges.

**eXplorance Blue Summer Questionnaires and Projects**
This project tracks the rollover from Spring 2016 (2163), editing, testing, data population and publishing of Summer 2016 (2165) term evaluation projects delivered via the eXplorance Blue course evaluation system.

*Expected Completion Date:* May 20, 2016

In Progress (On Schedule)

All Blue questionnaire projects progress through four stages each semester: **TR**: Project Transition from the previous semester, **PT**: Pre-test configuration: **PP**: Pre-Publish configuration and test, **PB**: Published.

All Blue projects are currently in either the **TR** or the **PT** phase, depending on whether they have opted in for Summer and whether any changes were necessary to correct errors for the previous semester. All work is on schedule. The full opt-in scope for summer should be known by May 15, 2016.

**Financial Aid**

**Financial Aid Accept Decline Awards Self Service Messaging**
Have a page come up after the student hits submit on the Accept/Decline Award that then would provide the information for each of the actions related to the loan item type (i.e. if they accepted the Staffords-MPN/Entrance info, if they declined the PLUS- what to do have them re-offered in the future, etc.). Since that would be a bolt on page, rather than a mod to the delivered self service page, it would be easier to implement as well as maintain.

Also create a page that Student Financial Services would maintain with the messaging, so they can update it whenever they need/want to. Alert a student to next steps after they choose submit on the Accept/Decline Award page in Self Service. Project updated to utilize Notification Framework to provide the notification vs. having a static page come up (which was the original plan as a bolt on to Self Service).

*Expected Completion Date:* June 1, 2016

In Progress (On Schedule)

The project has started and Enterprise Systems has been able to test utilizing Notification Framework to send a notification when a student takes action on the Accept/Decline page in Self Service. At a meeting with Student Financial Services on 11/19/15, it was determined that moving the due date of the project to 6/1/15 would be best to allow for using and testing Notification Framework. Student Financial Services provided wording for testing, which has been successful. In addition, adjustments to other aspects in the portal have been made for pagelets and award message catalog items. Enterprise Systems is meeting internally to discuss security and roles and David in Student Financial Services is meeting with his management team to discuss time frame for going live with the functionality. This project is currently on track.

**Financial Aid SAP DOC Intake**
Student Financial Services would like to streamline the interaction with Academic Advisors regarding a students Maximum Time Frame for Satisfactory Academic Progress. This project would simplify the process for obtaining the required documentation from Academic Advisors for students.

*Expected Completion Date:* August 1, 2016

In Progress (On Schedule)
Project charter was signed off on by all parties and was presented to Associate Directors on 1/28. Kick off meeting was held 2/10/16. Tasks have been outlined and work has begun on various aspects of the project, from adding a new section on the advising report to creating emails using 3Cs for academic advisors. Student Financial Services has provided users for security setup to view Advising notes. Project team is scheduled to touch base 4/5/16 to detail out remaining items and identify the remaining issues. Team discussed the need to actually extend the project longer as nothing can go live until mid-May or after and then it will be used throughout the summer for evaluating and contracts. The project team changed the due date to 8/1/16. The entire team and Ruth Ryan (Advising) are meeting every other week to touch base. Project is currently on track.

**Satisfactory Academic Progress Bolt-On**
This project will use the existing process for Satisfactory Academic Progress and create a new version that will point to financial aid data in order to more accurately report progress for students that drop classes between the 10th and 30th days of a semester.

**Expected Completion Date:** May 20, 2016

- **In Progress (At Risk)**

Testing and work on creating a bolt on for SAP to handle students who drop between 11th and 30th day finished and it does not work. The process does not operate as desired, and it is not possible for the tech team to modify the behavior without negative outcomes nor is it sustainable. Multiple options have been explored and tested. A meeting was scheduled to bring Enterprise Systems, Student Financial Services and Student Records together to discuss the options. Student Records is continuing to look at the outcomes of changing configuration. Student Records also proposed approaching this by changing policy to not allow drops after the 10th day, without a penalty. This is going to be presented as a proposal by Student Records with Student Financial Services partnering together. Work has paused until a decision is made for which option will be used.

**Graduate School**

**Build Academic Advising Reports for the Graduate School**
An Academic Advising report will be built for all graduate certificates, masters and doctoral degrees in the graduate career.

**Expected Completion Date:** August 26, 2016

- **In Progress (At Risk)**

The Graduate School is continuing their review of department handbooks and delivering approved versions to Enterprise Systems to be coded into myWSU. The reports for College of Arts and Sciences are complete. We anticipate completing the final CAHNRS reports this week, putting the project about five weeks behind the original schedule. Anticipating this, the project plan intentionally allotted extra time for the additional departments, so we expect to make up time over the next month.

**FERPA for non-WSU individuals**
With plans to grant myWSU access to external committee members, the Graduate School has requested a process that will allow non-WSU employees, particularly those serving on graduate research committees, to review FERPA guidelines and provide an electronic signature to agree to comply with the terms and conditions without being required to take the FERPA test that all WSU employees must take.

**Expected Completion Date:** July 29, 2016

- **In Progress (On Schedule)**

Development has begun on a page that will allow committee members not employed by WSU to access a page within myWSU and read and agree to abide by the FERPA regulations. Enterprise Systems also worked with the Graduate School to define policies regarding the expiration and renewal of the agreement.

**Graduate Research Management**
The Graduate School and Enterprise Systems will begin utilizing the graduate research management module to
track graduate students. This offers the ability to track candidates' time to degree, create assignments, and allow for the submission of electronic documents.

**Expected Completion Date:** February 24, 2017

**In Progress (At Risk)**
Academic Coordinators throughout the Graduate School are now submitting forms via Service Requests. More than 2000 service requests have been created since training was offered in December (up from 700 last month). Automated Email notifications have been configured for completed Service Requests. Work is progressing to enable myWSU access for non-WSU committee members, including the abbreviated FERPA training and the release of the Service Request Dashboard. This month we began reviewing the processes related to Thesis Submission, Final Exam Scheduling and Balloting, all within myWSU. We anticipate piloting the electronic ballot feature this Summer.

**MyGradSchool Database Conversion**
Graduate School and Enterprise Systems will be converting MyGradSchool MS SQL database to PeopleSoft Campus Solutions.

**Expected Completion Date:** August 1, 2016

**In Progress (On Schedule)**
The Graduate School has documented the current workflow associated with support memos and research/teaching assistantships and fellowships functionality in MyGradSchool database. Enterprise Systems has been led through the current business processes required to maintain support memos and assistantships/fellowships in MyGradSchool, PERMS, HEPPS and MyWSU by the Graduate School. Enterprise Systems is currently developing initial component and page designs in MyWSU for support memos and research/teaching assistantships and fellowships.

**Student Financials**

**HigherOne CashNet Implementation**
Implement New Cashiering and e-commerce Infrastructure for WSU. HigherOne was the successful vendor from an RFP. Project will encompass Cashiering, Credit Card, eCheck payments, Web Site e-commerce and student account updates to PeopleSoft.

**Expected Completion Date:** August 22, 2016

**In Progress (Critical)**
Cashnet Implementation appears to be on hold. While all refund issues have been resolved, the cashiering and ePayments module are not able to post specific payments. This issue continues to elude HigherOne Staff.

WSU has created a static balance file that has been incorporated, such that if the system were to time out, the customer information would be pulled from the static file. The static file will be uploaded once a day.

In response to HigherOne’s request that WSU limit student account activity to 15 days for Dynamic Bill (real-time lookup of account activity that Students and Parents would utilize), WSU built the CI. WSU is awaiting HigherOne’s staff to create a format template and incorporate both into ePayments. The CI was delivered on April 20th, and has not been incorporated as of May 5th.

HigherOne did incorporate invoice numbers into the ePayment module, so that students and orgs will be able to see specific invoice numbers in ePayments.

Dr. Pillay has a conference call with HigherOne Leadership on May 13th that should provide insight to the culmination of the project and perhaps a guaranteed go-live date. A firm go-live date will depend on the specific customer payment working and successful end to end integration testing.
Student Records

No Projects at this Time

Technical

Azure Proof of Concept
The Azure proof of concept project will explore the services offered in the Azure cloud. By implementing different services currently utilized by UISS, Global Campus, and Enterprise Systems within Azure we hope to answer the following questions. Is Azure a valid service provider? Can we host some or all of the services tested? What issues and risks were identified with Azure? What the next steps should be in regards to using Azure?

Expected Completion Date: August 1, 2016

In Progress (On Schedule)
The project plan was completed in April and work quickly began. The project is currently progressing as planned and is a little over 18% complete.

Mulesoft
Project will implement Mulesoft as Enterprise Systems integration platform.

Expected Completion Date: January 20, 2017

In Progress (On Schedule)
The first weekly meeting will be held May 2, 2016 and the team will discuss the scope and purpose of the project. The initial step of inventorying current web services is complete. The next step of defining the Application and the Integration Architecture and setting up a Que Box will begin the week of May 9, 2016. Once this is finished the tech team will be able to begin integrating services into Mulesoft and start testing.

PeopleTools 8.55 Upgrade
This project will track the implementation of PeopleTools 8.55 within all of Enterprise Systems Campus Solutions environments.

Expected Completion Date: August 6, 2016

In Progress (On Schedule)
The project is in the preliminary build out phase where Oracle is building the new servers to handle Windows Server 2012. Once the new servers are built, Enterprise Systems will get back to the posted schedule for getting portal demo, portal dev, and portal test completed in May with the date of June 18, 2016 for Portal Prod.

PROJECTS COMPLETED THIS MONTH

Blue DIG Production
This project is for tracking work and issues for production DIG in term 2163. DIG is used by college course evaluation coordinators to prepare data for Spring 2016 course evaluations.

Completed

Blue Set Up DIG Dataflow
Some projects will require data to be exported from DIG datasources, modified in BlueSIS, and re-imported into CE datasources. We need to review and update the procedures we used last semester.

Completed
**Blue Set Up SIS-to-Blue Data Flow**
Enrollment, teacher assignment, and person data flows from myWSU to the BlueSIS database server, is imported and processed in the BlueSIS database, and is exported from there to Blue. These flows need to be updated and enhanced for term 2163.

- Completed

**eXplorance Blue Spring 2016 Questionnaires**
Questionnaire Revisions for Spring 2016 Course Evaluations in eXplorance Blue.

- Completed

**Oracle Mobile**
Oracle released a mobile application for Campus Solutions (myWSU). The application installs natively on iOS and Android devices. This student facing application will allow students to see their schedule, grades, financial aid, student financials, and add / drop classes from their mobile devices.

- Completed

**RT Role Removal**
This project will remove unnecessary RT roles from users across campus. This will open up the queries that they are able to view and access in Production Query Viewer.

- Completed

**Summer Session Accounting Update**
Summer session is now operating under WSU Online. This project will update the accounting behind all item types associated with summer session to reflect the changes necessary for the new assignment.

- Completed
