WSU Zoom Security Updates Training Video & FAQ's

— 4/6/2020 —

Due to increased security needs, WSU updated security settings within the Zoom application for all WSU users, effective on Friday, April 3, 2020. This and other Zoom-related topics were discussed in a Q&A session with faculty and staff on Monday, April 6, 2020.

Q&A Video Quick-Links of segments answering the following questions:

What is "Zoombombing?"

Has ITS enabled automatic passwords for all Zoom meetings?

Can I still start/join Zoom meetings via my web browser?

How do students and guests get into my meetings, now?

How do I find WSU self-help articles pertaining to Zoom?

What is a "Zoom client" and how do I download one?

How do I find and change my Zoom settings?

What settings am I not allowed to change?

How do I change settings for a recurring meeting?

Will non-WSU affiliates and guests still be able to join my meetings?

(Accessibility) Will non-WSU live captioners need a Zoom account to access classes?

Do I need to create a new meeting link for my Blackboard class or set up a different/new one?

Can WSU track down Zoombombers?

Will bots be able to scan for meeting passwords?

How do passwords affect personal meeting rooms and waiting rooms functionality?

Can I disable chat and/or remove participants?

Can I change the password to a word or something easier to remember?

How do students access Zoom meetings via Blackboard?

Should I test my settings?

What should I consider before livestreaming a Zoom meeting?

When did these new security settings take place?

How do I enter a Zoom password with a Polycom?

What should faculty be communicating to their students about the new Zoom updates?

If I'm a presenter but not the host, can I change the meeting settings?

Do these Zoom updates apply to all campuses?

If I have the old, password-free meeting still posted in Blackboard, is that meeting vulnerable to Zoombombing?

Is there someone extension staff should work with, specifically?
